### ABSTRACT

Small Scale and ancillary units (i.e. undertaking with investment in plant and machinery of less than Rs. 10 million) should seek registration with the Director of Industries of the concerned State Government. However, the registration scheme has no statutory basis.

Actually, the main purpose of Registration is to maintain statistics and maintain a roll of such units for the purposes of providing incentives and support services, either by the Central or State Govt. But in reality there are a huge number of unregistered units in the SSI sector. No doubt, both registered and unregistered SSI units are playing a very vital role in the SSI sector of India. But regarding facility, help, recognition, supports etc are concerned registered units are placed in better position and unregistered units lacking such all opportunities. As per the observation the govt has taken several steps to get register the units and enhance productivity, efficiency and competitiveness of the whole SSI sector of India. But it is not happening as per the data available. Thus, finally, the wish is that the system not only make units registration compulsory by law, but at the grass root level it should be see that the SSI units get registered or treat and support equally both registered and unregistered SSI units in the economy.
